As the students are center of attention in every educational institution and one of the most important stakeholders, all the programs are designed to fulfil their requirements. They

are given representation in curriculum development, seminars, group discussions and they are prepared to develop the leadership qualities by giving representation on the basis of the best performance in their results.

In every activity, one or two students are selected to represent the students' community. The class representative takes the responsibility of collecting seminar topics from students, fixation of dates in consultation with student colleagues, announcement of topics and dates in advance in department notice board, organization of seminars every week.

The department conducts the bridge courses for lateral entry students in communicative English, mathematical foundation and essential of Programming after the regular class work. Remedial Classes are conducted by the subject experts beyond working hours. These course are not part of their time-table. Special coaching classes are offered to quality GATE & Competitive exams and students were benefitted during the assessment period.

#### **Mentor:**

For effective mentoring and for the welfare of the students, 10-15 students are attached to a faculty mentor and One mentoring record for each student is maintained and updated throughout the wards tenure in the institution. The mentoring system is adopted to improve the rapport between the faculty and students. The main objective is to keep track of the progress of the students and counsel them accordingly for academic and personal guidance. Parents of the students are timely informed wherever the necessity arises such as lack of attendance, poor academic performance and psycho-social problem.

### 2.5.2. Reforms initiated on Continuous Internal Evaluation (CIE) system at the institutional level (250 words)

The process for internal Question paper setting and evaluation is as follows:

- All the faculty members are asked to submit the Question bank comprising of 30 questions with 5 questions from each unit for each course.
- For Each Question they should mention marks awarded course outcome number and blooms taxonomy level.
- Question banks for all the courses is collected and sent to examination section.
- Examination section will set the question paper for internal examinations from the question bank sent by the faculty for each course.
- After the internal examination is completed, the scripts were handed over to the concerned faculty to evaluate.

- Before evaluation the concerned faculty has to prepare the scheme of valuation.
- The faculty has to write the comment for each question while evaluating the internal paper and award the marks.
- The internal marks should be submitted in the sheet and is to be certified by the HOD.

**Evaluation Process for internal examination:**

- After the internal examination is completed, the scripts were handed over to the concerned faculty to evaluate.
- Before evaluation the concerned faculty has to prepare the scheme of valuation.
- The faculty has to write the comment for each question while evaluating the internal paper and award the marks.
- After evaluation Scripts are distributed to the students and answers will be discussed in the classroom

**Continuous Assessment in laboratory:**

- Continuous assessment system is also implemented for assessment of laboratory work.
- The assessment is done on the basis of submission of laboratory records understanding of the experiment through oral viva voce questions and participation in performing the experiment.
- Neatness of the laboratory record book is also given weight age in the assessment.
- Every week faculty updated student record marks in teacher log book
- For practical subjects there shall be continuous evaluation during the semester for 25 internal marks and 50 end examination marks.
- The internal 25 marks shall be awarded as follows: day to day work – 10 marks, Record-5 marks and the remaining 10 marks to be awarded by conducting an internal laboratory test.
- Internal semester examination marks will be awarded by considering parameters as follows: Aim, Apparatus and procedure – 4M, experiment conduction and calculations -4M and viva voce – 2M.
- The end examination shall be conducted by the teacher concerned and external examiner.
- External semester examination marks will be awarded by considering parameters as follows: Aim, Apparatus and procedure – 20M, experiment conduction and calculations -20M and viva voce – 10M.

**Quality of student projects**

In order to monitor the overall functioning of the activities related to the B.Tech. projects and to have academic bridge among the various groups, it is proposed to create two level of committees- one is Institute Project Cell (IPC) and second one is Department Evaluation Committee (DEC).

IPC of an Institute will comprise the Principal of the institute or his nominee as the Convener and all the heads of the departments. DEC will comprise the Head of the

Department as the Convener along with department project coordinator and three senior faculty members of the department and a faculty member from other department nominated by the IPC.

### **2.5.3 Academic calendar prepared and adhered for conduct of Examination and other related matters**

The Planning and organization of the teaching, learning and evaluation schedules for all courses in each discipline are done by the Academic Committee Consisting of the Principal, Deans and Heads of the Departments. The Academic Calendar is prepared before the commencement of academic year so that teachers and students have prior information about the commencement of semester, number of working days, holidays and tentative dates for mid-semester and end semester examinations. Departments will prepare their academic calendar and the HODs monitor the execution of the calendar which includes academic, co-curricular and extra-curricular activities.

Courses to be taught the list of courses for the upcoming semester is prepared by the time table in-charge of the department. Course options are taken from the faculty members. Course Allocation Based on the course preference list, the Head of the Department finalises the course allocation to the faculty members. Faculty members prepare the lesson plan, assignment questions for their respective course. The course plan is made clear and understandable and reflects what the faculty member is planning to do for the current semester course. All the faculty members of the department prepare their lesson plan for their respective courses. Time Table Time table committee prepares the time table under the guidance of the time table coordinator.

### Human Resource Management

- New recruits are mentored by senior faculty.
- Regular self appraisal of faculty is done and will be verified HoD' s and Principal at the end of every Academic Year.
- Students fill online feedback form for each faculty for different subjects and laboratories.
- In the staff meeting, staff members are shown their individual feedback and after the meeting principal has one on one discussion with each staff member on the basis of analysis of their feedback.

### Industry Interaction / Collaboration :

Industrial visits give greater clarity about importance of various Engineering concepts, as students practically experience how these concepts are put into action. Our College encourages industrial visits as a value-added learning method for engineering students. Learning from textbooks, lectures and other study material does not suffice for holistic learning. Practical and hands-on learning is essential for better understanding of work processes. Conducted Pre visit and Post visit survey for assessing the students.

Sasi Institute of Technology& Engineering, motivates students to undertake internship programs in various well known firms both public and private sector. It provides an opportunity to work on real world projects to hone their skills on cutting edge technology. This helps students to develop a network and contacts. The students enjoy the opportunity which is able to meet their particular interest.

After the industrial training/internship, feedback is collected from the students and used for impact analysis. Evaluation form collected from the industry for assessing students. The institution has signed MoU with various industries. These industries involve in designing the program, depute trainers to train the faculties and students of our institution

### Admission of Students

Admission process is as per Norms of university and senior students are also involved in the collection of admission forms, data compilation with the objective of acquainting them with the admission process.
